

The Nueces River Authority is soliciting RFQ's to enter into an agreement with a qualified individual, firm, or corporation to conduct an engineering assessment of the City of Alice, Texas Southside Wastewater Treatment Plant (WWTP). This facility is one of 13 WWTP's discharging into San Fernando Creek thence Baffin Bay. The Southside WWTP facility is in need of repairs. The project will assess the facility and prepare an application for the Texas Water Development Board's Clean Water State Revolving Fund. The overall goal of the project is to improve water quality in San Fernando Creek and Baffin Bay.
