

Nueces River Authority

YOU ARE INVITED!

Nueces River Authority Harbor Island Desalination Plant Kickoff Industry Opportunity Briefing & Networking

The Nueces River Authority is stepping up to “turn the tide” for South Texas. The NRA intends to select and engage a P3 partner to build a 100 Million Gallon per Day (MGD) seawater desalination project on Harbor Island. On July 10, we invite you to join us to build relationships and meet the NRA Team.

You will learn more about this generational infrastructure water development project and meet others who are interested in developing it. By joining us, your company information will be included as a vendor resource for the Harbor Island Desalination project.

Provide Your Company Contact Information and the Names of Team Members Attending

Nueces River Authority was created in 1935 by a special act of the 44th Texas Legislature and has broad authority to preserve, protect, and develop surface water resources including flood control, irrigation, navigation, water supply, wastewater treatment, and water quality control. NRA's jurisdiction includes all or parts of 21 counties, where the future water supply deficit is projected to be as high as 400 MGD by 2070. www.nueces-ra.org
